

Churchill High School Woodworking Safety Sheets

QR codes have been supplied on all the large machinery in the shop for your convenience. This is ***not*** in any way meant to replace the lesson provided by your instructor but rather to compliment it. Scanning the QR code on this sheet or on any of the machines will take you to the specific page on Mr. Correia's website that has the safety for that particular machine.

Please do not scan code when machine is in operation.
